+20 1002510720
New Cairo , Egypt

Computer Science graduate from BUE (Information Systems) with strong skills in Python, SQL, Power BI, and data visualization. Delivered a full-stack machine learning project predicting football player values, covering data cleaning, feature engineering, model development, and deployment. Motivated to apply my analytical skills to transform data into clear, actionable insights.

Education

Computer Science at British University in Egypt

September 2021 - June 2025

Grade: Very good with high honors

Projects

Football Transfer Market Value Prediction System • ↗

Built an end-to-end machine learning system to predict football player market values using historical transfer data, performance metrics, and player attributes. Collected, cleaned, and explored data; engineered features and prepared modeling datasets in Python (pandas, scikit-learn). Trained and compared multiple regression models, selecting XGBoost for best performance, and integrated the model into a full-stack web application with a Vue.js frontend and a Node.js/Python backend for inference and data handling. Model performance (XGBoost): $R^2 = 0.905$; MAE = 2.61M; RMSE = 5.98M; MAPE = 41.5%.

Tools: Python, pandas, scikit-learn, SQL, Vue.js, Node.js, SQLite

Tech Companies Revenue Analysis • ↗

Built an end-to-end analytics pipeline by scraping the “Largest Tech Companies by Revenue (2025)” dataset from Wikipedia, cleaning and validating it in Python (pandas), loading it into SQLite, and running EDA. Created an interactive Power BI dashboard to analyze revenue, workforce distribution, and country performance using filters and KPI visuals.
Tools: Python, pandas, SQL, SQLite, Power BI

Skills

Data & Analysis: Data Analysis • Exploratory Data Analysis (EDA) • Data Cleaning & Validation • Data Transformation • Feature Engineering • KPI Definition • Insight Generation • Reporting & Storytelling

Technical Skills: SQL (Joins, CTEs, Window Functions) • Power BI (DAX, Power Query, Data Modeling) • Excel (PivotTables, Power Query) • Python (pandas, scikit-learn) • SQLite • PostgreSQL • MongoDB • Git/GitHub

Soft Skills: Analytical Thinking • Problem Solving • Communication • Attention to Detail • Stakeholder Collaboration

Business & Operations: Requirements Gathering • KPI Tracking • Dashboard Development • Process Improvement • Workflow Optimization • Data-Driven Decision Support

Productivity Tools: Microsoft Excel • PowerPoint • Word • Google Workspace • Documentation • Presentation Design

Internships

Front-End Development Internship at Nafis Technologies

July 2024 - September 2024

- Developed a Vue.js blog platform featuring user authentication and post search to improve content discovery and user experience.
- Integrated REST APIs using Axios and handled responses/errors to ensure reliable data retrieval.
- Tested and validated API endpoints using Postman, ensuring correct request/response behavior.

Certificates

SQL Associate from DataCamp

October 2025 • ↗

Data Analyst Associate from DataCamp

November 2025 • ↗

Data Engineer Associate from DataCamp

November 2025 • ↗

Languages

Arabic - Native

English - Proficient
